PUBLISHING YOUR PAGE

If you have Publishing permissions, all you need to do to publish your page (show it on the Internet) is to select the Page or Folder, click the ‘Publish’ tab, then click Submit.

If you selected ‘go to publish status page after publishing’ in your preferences, the progress of the publishing will be displayed as a percentage. It should not take long unless there are many Queued Jobs listed.

If your page does not appear to have updated in your browser, you may need to press Ctrl-F5 to force your browser to update the cached view.
