Note: Each model comes with many additional options at set pricing, so that each Print Center may configure a solution that works for their individual department/college needs. All units are able to be placed on the District's network for printing and all units include scanning capabilities.

Each bid was scored initially by pricing reflecting purchase price and also leasing factors and costs to determine the three finalists based on cost and then a qualitative analysis was done to determine the finalist. The three finalists were Ricoh, Canon and Xerox. The finalists and recommended vendors for this award are Ricoh for the 125-135 ppm units and MRC for the 150 ppm unit.
